

# DELIVER YOUR SAMPLE TO SEACOAST ANALYTICAL 7 DAYS A WEEK

Deliver your sample the same day you collect the sample. This will ensure we receive it within the required 30 hours. We check for samples every day.

## - MAILING OPTIONS -

If you choose to mail your sample, please collect it MONDAY through FRIDAY, and mail THE SAME DAY.

We receive many priority mail samples the next day, but it may be wise to use an overnight service such as USPS, FedEx, or UPS to make sure we receive the sample the next day.

**MAIL SAMPLES TO: Seacoast Analytical Services  
15 Mallego Road # 555  
Barrington, NH 03825**

Your report will be ready one day earlier if you decide to deliver the sample to us, since it takes at least one day for the mail to reach us. In either event, thank you for choosing Seacoast Analytical Services for your water and radon testing.
